Trigger : When this happens ...
1. Webhook : Capture Webhook

Instant

Free Task

Choose App

 Webhook by Pabbly

Webhook URL

https://connect.pabbly.com/workflow/sendwebhookdata/ljU3NmMwNTZhMDYzNTA0MzM1MjY0NTUzNil_3D_pc

Copy

Copy the webhook URL and add it under the webhook section of the application you're willing to integrate with. Once you're done with adding the webhook URL, then do a test submission/record in that application in order to capture the webhook response here. Note that webhook URL is unique for every workflow.

Action : Do this ...
Ultramsg : Send Message

Help guide

Choose App

 Ultramsg

Action Event

Send Message

Connected

To (Required)

Phone with international format e.g. +1408XXXXXXX , or chatID for contact or group

Body (Required)

Message text, UTF-8 or UTF-16 string with emoji. Max length : 4096 char.

Priority

Enter priority to create a professional queue for messages. The messages with less priority value are sent first. For sending non-urgent promotional offers and notifications to your customers, enter 10. For sending general messages, enter 5 and for sending high priority messages like OTP, enter 0. Default priority will be set as 10.
