

Initial Setup

Selected Sheet:

Webhook URL:

Enter webhook URL, eg: https://

You can get the webhook URL from Pabbly Connect Workflow

Trigger Column:

Enter trigger column name, eg: E

The trigger column will be your final data column on which if the data is added, the whole of that row data will be sent to the webhook URL

Submit Send Test

"No item with the given ID could be found. Possibly because you have not edited this item or you do not have permission to access it."
