

Stripe to Google Drive -

Trigger : When this happens ...

1. Stripe : New Charge

Choose App

Stripe

Trigger Event

New Charge

Webhook URL

https://connect.pabbly.com/wi

Copy

To add a webhook to your Stripe account, follow these steps:

- Sign in to your Stripe account and navigate to the [developer's](#) page.
- Once you reach the developer's page, go to the Webhooks section and click on "Add endpoint."
- Copy the webhook URL provided above and paste it into the "Endpoint URL" field.
- Provide a description of your choice for the webhook and select "Events on your account" in the Listen to section.
- Choose the latest API version and click on "Select event."
- From the Select Events dropdown, choose "**charge.succeeded**".
- Click on "Add event," followed by "Add endpoint."
- Click on the "Capture Webhook Response" button below. It will change to "Waiting for Webhook Response" and execute the selected event in Stripe so that the webhook response can be captured here.
